# Reverse Osmosis System

## Features & Benefits

The H2ORO400 is designed to produce worry-free RO Water, with less waste. Our 400 gallons per day Thin Film Composite Membrane, produces high quality drinking water at a fast rate. It removes a vast assortment of water contaminants by filtering down to 0.001 Micron.

With the H2ORO400 system you will never have to worry about purchasing bottled water again. This system will provide you and your family with the purest drinking water available on the market today.

### Benefits

- Delicious, Clear, Pure Drinking Water
- Flavourful Coffee, Tea, Juices, Stews, Gravies
- Cleanly rinsed fresh fruits and vegetables
- Better tasting Soups, Rice, Noodles and any meal when prepared with RO water
- Very Cost Effective
- NO more bottle water

### ENVIRONMENTALLY- FRIENDLY

You don't have to buy and carry bottles of water, saving thousands of bottles from clogging our landfills (it takes a plastic bottle over 100 years to biodegrade).

### SAFER WATER

Multi-filtration process includes a Reverse Osmosis membrane to provide you with the purest water for your consumption.

### CONVIENIENCE

Enjoy an endless supply of water with a push of a button right at your kitchen sink, refrigerator dispenser.

### BETTER TASTING WATER

Pure water will improve the taste of everything you make including coffee, teas, drinks, ice cubes, baby formula, and all your recipes.

### HEALTHIER CHOICE

Removes 97-99.99% of contaminants from your water leaving you with only the purest drinking water available on the market today. Eliminates the risk of BPA leaching into your water from plastic bottles.

### COST SAVINGS

Glass for glass, your water costs will be far less than buying single-serve bottles of water from the store.
