

# Premium Reverse Osmosis System

H2ORO400 With 400 Gallons / 1514 Litres per DAY capacity

## Virtually unlimited Premium Water all day, every day!

Our H2ORO400 exclusive Reverse Osmosis drinking system demonstrates breakthrough Reverse Osmosis Technology. The H2ORO400 features a fully encapsulated 400 Gallon per Day Membrane, 1:1 product to waste ratio for a very efficient operation. ULTRA FAST FLOW RATE AND ULTRA FAST STORAGE TANK RECOVERY.

### Unique Features

- Pressure Gauges to monitor pre-filters
- Quick change sealed cartridges to protect from any outside contamination
- The most efficient RO system on the market today with a 1:1 product to waste ratio
- Stainless steel bracket
- Space saving design
- Quality Workmanship

### The 5 Stages of Filtration.

**1st Stage:** 5 Micron Sediment Filter that removes Silt, Dirt, Rust and Sand

**2nd and 3rd Stage:** Carbon Blocks that removes Chlorine, Chloramines, THMC (Trihalomethanes), Taste and Odour

**4th Stage:** Reverse Osmosis Membrane that removes a wide variety of contaminants such as: Lead, Fluoride, Cryptosporidium, Arsenic, Cyanide, Radioactivity, Sodium, Bacteria and Mercury

**5th Stage:** Post Polishing Carbon Filter which enhances the Taste of the Water

Technology that inspires healthy living

# Premium Reverse Osmosis System

## Features & Benefits

The H2ORO400 is designed to produce worry-free Reverse Osmosis Water, with less waste. Our 400 gallons per day Thin Film Composite Membrane, produces high quality drinking water at an extremely fast rate. It removes a vast assortment of water contaminants by filtering down to 0.001 Micron.

With the H2ORO400 system you will never have to worry about purchasing bottled water again. This system will provide you and your family with the purest drinking water available on the market today.

### Clear Benefits

- Delicious, Clear, Pure Drinking Water
- Flavourful Coffee, Tea, Juices, Stews, Gravies
- Cleanly rinsed fresh fruits and vegetables
- Better tasting Soups, Rice, Noodles and any meal when prepared with RO water
- Very Cost Effective
- NO more bottle water

### ENVIRONMENTALLY- FRIENDLY

You don't have to buy and carry bottles of water, saving thousands of bottles from clogging our landfills (it takes a plastic bottle 450 to 1000 years to biodegrade).

### SAFER WATER

Multi filtration process includes a Reverse Osmosis membrane to provide you with the healthiest and safest water available.

### CONVENIENCE

With the turn of a lever you can enjoy an endless supply of filtered water right at your kitchen sink. In most cases the system can also be hooked up to your refrigerator dispenser as well.

### BETTER TASTING WATER

Pure water will improve the taste of everything you make including coffee, teas, drinks, ice cubes, baby formula, and all your recipes.

### HEALTHIER CHOICE

Removes 95-99.99% of contaminants from your water leaving you with only the purest drinking water available on the market today. Eliminates the risk of BPA leaching into your water from plastic bottles.

### COST SAVINGS

Glass for glass your water costs will be far less than buying a bottle of water.
