

Premium Whole Home Carbon Unit

H2O SVC1 is a high-flow whole home carbon filtration system that is perfect for chlorine and chloramine removal, and general water quality improvement.

How would you like to have CHLORINE FREE water at every tap in your home?

Think of it – pure filtered water for laundry, showers, baths and brushing your teeth! Did you know that you absorb ten times more Chlorine in your skin from showers than drinking it? In addition, you inhale it when you shower as Chlorine is both a chemical and a gas.

Our whole house water filtration systems are placed on the main water line that enters your home to ensure you get the best possible water on every tap.

Benefits:

- Made in Canada
- Excellent for use in de-chlorinating water and removing odours
- No more Chlorine smell when you use any tap in your home
- Shower and Bathe in Chlorine FREE water
- No backwash required!

Features:

- 1.0 Cubic feet of Coconut Carbon filter media
- Size including Valve 10x54
- High Flow 1" Static Valve
- Neoprene Sweat Jacket
- Easy to turn Bypass

Technology that inspires healthy living
