

H2O 4Life Premium Iron Filter Series

H2O 4Life Premium Iron Filter

Whole Home Iron/Sulphur/Manganese Filtration System

Iron, Sulphur and Manganese all contribute to water quality problems. Iron causes red/brown staining on fixtures, clothing and appliances. Sulphur is easily detected by the presence of a "rotten egg" smell. Manganese is most often seen as a black slimy substance that builds up in standing water (toilet tank).

Unique Features

- The most Powerful Chemical-Free Application on the Market
- Removes Iron, Sulfur and/or Manganese
- Requires NO Chemicals (potassium chloride)
- Able to Treat Higher Flow Rates
- High Efficiency Premium Media
- Advanced Electronic Controller
- Low Voltage Operation
- Air Injection System

H2O 4Life Premium Iron Filter Series

Premium Iron Filter

Features & Benefits

The H2O Premium Iron Filter system is the most effective and environmentally friendly solution to treat your water. It's safe and very economical because it requires none of the messy and expensive chemicals conventional Iron Filters use. Our system eliminates the staining, metal taste, embarrassing odour through the use of self-contained air injection and specially designed media for well water applications. The result is clean, clear and odour free water at every faucet.

How does this work

Self – Contained Air injection System, it requires oxygen which is supplied by atmospheric air. The system draws air in during its backwashing cycle every 2-5 days. Aeration causes iron and other dissolved trace metals to convert to solids that can be easily filtered out by the media. These trap solids will be later discharge during a regeneration.

Enjoy:

- Water that Feels, Taste and Smells Better
- No More Iron in your Washing Machine, Dishwasher, etc.
- Your Cloth, towels are cleaner and whites are whiter
- Clean ,Clear and Odour Free Water at every Tap
- Less Maintenances on your appliances and fixtures
- Save time and money

H2O Premium Iron Chem FREE Filter

Part#	Description	Size incl. Valve
H2O TOK1	Removal of Iron, Manganese & Sulphur	9x52
H2O TOK1.5	Removal of Iron, Manganese & Sulphur	10x57
H2O TOB1	Removal of high Iron & Manganese	9x52
H2O TOB1.5	Removal of high Iron & Manganese	10x57
H2O TOC1	Removal of high Sulphur	9x52
H2O TOC1.5	Removal of high Sulphur	10x57
